

# Proposed Widening and Overlay of SR 1/US 27 from Turnberry Lane in Muscogee County to SR 315 in Harris County Georgia

In compliance with Governor Brian Kemp's directive to keep state government agencies functioning as Georgia combats the COVID-19 pandemic, Georgia DOT and the Transportation Investment Act (TIA) program are moving forward by placing project information and coordination into a web-based platform so that there will be no need for direct face-to-face contact. We appreciate your participation in this process. Although the Georgia DOT and TIA encourages people to utilize the online platform, one-on-one meetings may be requested by calling one of the contacts listed below.

This outreach for PI 0006446 serves as follow up from a previously held public meeting in July 2019, and the current conceptual drawing and project information is available online at the link below. An opportunity to comment will be available online; however, please contact us if alternate accommodations are needed. This project proposes to widen the existing 2-lane and 3-lane SR 1/ US 27 to a 4-lane section with a variable 4-foot to 12-foot flush median from Turnberry Lane in Muscogee County to Raymond Drive in Harris County, then overlay the existing roadway from Raymond Drive to SR 315 in Cataula with asymmetrical widening and overlay to the west of SR 1/US 27 between Preston Road and Holland Road. The SR 315 intersection with SR 1/US 27 is proposed to be a new location roundabout in Cataula.
